Professional Experience

DevOps Engineer @ Cyber Insight (2026 - Present at Leipzig, Germany)

- Standardized GCP Managed Instance Group (MIG) update policies across dev, staging, and production environments, implementing proactive VM replacement and optimizing health check configurations to ensure zero-downtime rolling updates.
- Transitioned Cloud SQL (PostgreSQL) user management to native GCP IAM Database Authentication, eliminating password-based credentials and third-party database provider dependencies in Terraform while enforcing Role-Based Access Control (RBAC).
- Integrated Google Certificate Authority Service (CAS) with Certificate Manager to automate TLS certificate lifecycles; designed a centralized CA pool topology that minimized certificate cost by sharing resources across multiple environments.
- Reduced Cloud Logging volume and ingestion costs by configuring GCP Log Router Exclusion Filters to suppress noisy `200 OK` load balancer health check logs while preserving anomalous error states for troubleshooting.
- Configured stateful properties on RabbitMQ Managed Instance Groups to preserve network identities and data disks across VM replacements, and engineered rolling maintenance procedures to optimize consumer timeout parameters to 10 hours for long-running workflows.
- Designed and implemented a hybrid DNS resolution system with self-hosted BIND9 and AdGuard Home on Debian, integrating on-premise networks with GCP Cloud DNS over Route-Based VPNs by configuring static routing, IPsec Phase 2 traffic selectors, and firewall policies.

DevOps Engineer @ Sky Deutschland GmbH (2021 — Present at Munich, Germany)

- Orchestrated GCP Cloud Infrastructure (GKE, VMs, MIGs) using Terraform and Ansible, ensuring 99.9% uptime and reducing provisioning time by 40%.
- Deployed Jenkins and SonarQube on GKE via Helm charts, streamlining CI/CD pipelines and increasing code quality coverage to 85%.
- Architected a highly available HashiCorp Vault Enterprise cluster, automating disaster recovery and securing 500+ secrets across hybrid environments.
- Engineered automated CI/CD workflows with Jenkins and GitHub Actions, reducing build and deployment times by 50%.
- Fortified security by integrating HashiCorp Vault with CI/CD tools and microservices, achieving zero hardcoded credentials in production.
- Automated patch management for HashiCorp Vault clusters using Ansible, reducing manual maintenance effort by 15 hours monthly.
- Implemented automated TLS certificate renewal via Cert Manager on GKE, eliminating certificate-related downtime.
- Established comprehensive monitoring with Prometheus and Grafana, creating 12 dashboards to reduce Mean Time to Detect (MTTD) by 35%.
- Configured proactive alerting via Microsoft Teams Workflows, decreasing incident response time by 30%.

Developer + DevOps Engineer @ SAP Hybris (SAP Customer Experience)

(2018 — 2021 at Munich, Germany )

- Developed high-performance Python and Node.js microservices, handling 2,500+ requests/second with 99.9% availability.
- Built serverless RESTful APIs using Golang and Python on AWS Lambda, reducing infrastructure costs by 25%.
- Optimized release pipelines using Jenkins, Ansible, and Terraform, cutting deployment time from 3 hours to 15 minutes.
- Migrated legacy applications to Docker containers on GKE and EKS, improving scalability and resource utilization by 40%.
- Configured AWS CloudFront and Akamai CDNs, reducing global latency by 45% for high-traffic E-Commerce sites.
- Enhanced system observability with AWS CloudWatch and Dynatrace, reducing production incidents by 20% through proactive alerting.
- Streamlined incident management with Slack Workflows, improving team collaboration and resolution speed.

Working Student @ Heidelberg Materials (HeidelbergCement AG)

(2015 — 2016 at Heidelberg, Germany )

- Designed complex SAP BW queries to extract critical sales data, reducing report generation time by 50%.
- Developed and maintained 10+ SAP BI dashboards, providing real-time insights for executive decision-making.
- Executed rigorous data validation protocols, improving data accuracy by 15% for sales reporting.
- Automated data processing tasks using VBA macros in Excel, saving 8 hours of manual work weekly.
- Automated sales performance reporting using SAP BI tools, ensuring timely delivery of key business metrics.

Associate Software Engineer @ Accenture Pvt. Limited (2013 — 2015 at Bangalore, India)

- Delivered 30+ SAP BI reports and dashboards, enabling data-driven decisions for sales and finance departments.
- Optimized SAP BW data models and ETL processes, reducing data load times by 25% and ensuring 100% data integrity.
- Leveraged SAP BI tools (BEx Analyzer, Web Application Designer) to create user-friendly reporting interfaces adopted by 150+ users.
- Engineered custom SAP ABAP solutions to enhance report functionality, meeting specific client requirements.
- Collaborated directly with clients to gather requirements, delivering solutions that increased user satisfaction by 20%.

Education

- **Master of Science - Applied Computer Science** (2015 — 2017)
SRH University Heidelberg
- **Bachelor of Engineering - Electronics and Telecommunication** (2009 — 2013)

Certifications

KCNA

CKA

CKAD

Istio

InfluxDB

HashiCorp Vault Operations Professional

HashiCorp Terraform Associate

AWS Certified Developer Associate

GCP Skills

GitHub Actions

GitHub Copilot

AI Essentials

Certified Jenkins Engineer 2020

Deutsch A1 Zertifikat - Telc
